The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.		
1. This communication is responsive to <u>06/01/05</u> .		
2. The allowed claim(s) is/are <u>1-22 and 24-35</u> .		
3. The drawings filed on are accepted by the Examiner.		
4.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Doug Sorocco on June 14, 2005.

The application has been amended as follows:

In claim 24, please insert the phrase,

-- wherein the disilane is represented by the formula $(R^{10}O)_x R^{11}_{3-x} Si-R^{12}_y$ -SiR¹³_{3-x} $(OR^{14})_x$, where x is 0, 1, 2 or 3 and y is 0 or 1, R^{11} and R^{13} are H or an alkyl group containing from about 1 to 10 carbon atoms, a functionalized alkyl group, an alkylene group, an aryl group, an alkylpolyether group and combinations thereof, R10 and R14 are H, an alkyl group containing from about 1 to 10 carbon atoms, an acetyl group, and combinations thereof, wherein if y is 1 then R^{12} can be an alkylene group containing from about 1 to 12 carbon atoms, an alkylene polyether containing from about 1 to 12 carbon atoms, an aryl group, an alkylene substituted aryl group, an alkylene group which may contain one or more olefins, or an oxygen or sulfur atom, and further wherein if x = 0, then R^{11} and R^{13} are a chlorine or bromine atom, and --

Art Unit: 1712

before the phrase "wherein the epoxy-functional silane is present..." in line 20 of the claim.

In claim 29, please insert the phrase,

-- wherein the disilane is represented by the formula $(R^{10}O)_x R^{11}_{3-x} Si-R^{12}_y-SiR^{13}_{3-x}$ $(OR^{14})_x$, where x is 0, 1, 2 or 3 and y is 0 or 1, R^{11} and R^{13} are H or an alkyl group containing from about 1 to 10 carbon atoms, a functionalized alkyl group, an alkylene group, an aryl group, an alkylpolyether group and combinations thereof, R10 and R14 are H, an alkyl group containing from about 1 to 10 carbon atoms, an acetyl group, and combinations thereof, wherein if y is 1 then R^{12} can be an alkylene group containing from about 1 to 12 carbon atoms, an alkylene polyether containing from about 1 to 12 carbon atoms, an aryl group, an alkylene substituted aryl group, an alkylene group which may contain one or more olefins, or an oxygen or sulfur atom, and further wherein if x = 0, then R^{11} and R^{13} are a chlorine or bromine atom, --

after the phrase "combinations thereof" in line 14 of the claim.

In claim 35, please insert the phrase,

-- wherein the disilane is represented by the formula $(R^{10}O)_x$ R^{11}_{3-x} $Si-R^{12}_y$ - SiR^{13}_{3-x} $(OR^{14})_x$, where x is 0, 1, 2 or 3 and y is 0 or 1, R^{11} and R^{13} are H or an alkyl group containing from about 1 to 10 carbon atoms, a functionalized alkyl group, an alkylene

Art Unit: 1712

group, an aryl group, an alkylpolyether group and combinations thereof, R10 and R14 are H, an alkyl group containing from about 1 to 10 carbon atoms, an acetyl group, and combinations thereof, wherein if y is 1 then R^{12} can be an alkylene group containing from about 1 to 12 carbon atoms, an alkylene polyether containing from about 1 to 12 carbon atoms, an aryl group, an alkylene substituted aryl group, an alkylene group which may contain one or more olefins, or an oxygen or sulfur atom, and further wherein if x = 0, then R^{11} and R^{13} are a chlorine or bromine atom, --

before the phrase "wherein the epoxy-functional silane is present..." in line 20 of the claim.

In a correspondence dated July 9, 2004, the Examiner had indicated that, while it had been known to add colloidal silica to organosilicon-based coating composition of the variety disclosed by Applicant as a means of enhancing abrasion resistance, there was little motivation to add colloidal silica to the invention disclosed Sawaragi insofar as that composition had already been stated to provide scratch resistance. It has since been determined however that it would, nonetheless, be obvious to incorporate silica for the purpose of conveying yet more protection against marring of the substrate surface.

Takeshita fails to contemplate those more specific embodiments of the disilane component that are disclosed in claim 1, which is why claims 1-22 are considered patentable over the prior art. Because it seemed clear that it was these incarnations of the disilane that Applicant was most interested in using anyway, the Examiner proposed that Applicant amend the

above claims to include this description to expedite the allowance of this case. (The Examiner explained that a new rejection would have to be formulated in view of the facts presented *supra* unless an amendment that avoided the art could be agreed upon. Applicant indicated that they were amenable to the changes set forth in the Examiner's amendment.)

With these amendments and the numerous terminal disclaimers filed by Applicant, there appears to be no further issues prohibiting the allowance of this case. Accordingly, claims 1-22 and 24-35 are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc S. Zimmer whose telephone number is 571-272-1096. The examiner can normally be reached on Monday-Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
